WORK EXPERIENCE

Nxt Sync Private Limited, Hyderabad.
Machine Learning Intern | Remote MAR 2026 – Present

- Working as a Machine Learning Intern gaining hands-on experience in ML fundamentals, AI tools, data preprocessing, model building, and AI-driven application development using tools like WEKA for data analysis and visualization.
- Developed an E-Commerce AI Assistant Chatbot using Dialogflow to enhance customer interaction, automate responses, and improve user experience through AI-powered conversational systems.

PCA and RD Bank, Shidlaghatta. 15 APR 2024 – 30 APR 2024
Analytical Study on Sustainability and Computation | Onsite
Analyzed banking sector data using Python to study sustainability practices, financial performance, loan growth, and digital banking trends. Generated insights and reports to identify factors influencing growth and competitiveness in the banking industry.

EDUCATION

Cambridge Institute of Technology, Kr Puram Dec 2024 – Present
Master of Computer Applications – 8.75/10

Pragathi First Grade College, Vijayapura Town July 2021 – Aug 2024
Bachelor of Science – 8.41 /10

Sai Vidya Nidhi National Pu College, H Cross May 2019 – June 2021
Science (PCMB) – 80%

PROJECTS

Intelligent Manufacturing and Supply chain Optimization Using Machine Learning Dec 2025 – Mar 2026

- Developed a machine learning–based system to enhance manufacturing and supply chain efficiency.
- Built predictive models to forecast product demand and optimize inventory management.
- Implemented models to detect potential machine failures using predictive maintenance techniques.
- Applied data analysis methods to support logistics planning and production scheduling.
- Implemented the system using Python, Pandas, NumPy, Scikit-learn, XGBoost, and Apache Kafka.

Ai Based Crop Care Advisor App June 2024 – Sep 2024

- Developed an AI-based mobile application for crop disease detection and crop health management.
- Enabled farmers to upload crop images for analysis using machine learning and image processing.
- Implemented disease detection models to identify crop diseases from plant images.
- Generated personalized recommendations for fertilizers, pesticides, and crop treatment methods.

SKILLS

- Languages: C, Python, Java
- Frameworks and Tools: Pandas, Numpy, Matplotlib, Git,
- Design – UI/UX
- Coursework: OS, DBMS, SQL, OOP, Data Structures & Algorithms.
- Mobile Application Development: Android Studio, Flutter, React Native

CERTIFICATIONS

- **Prompt Design in Vertex AI** – Mastered designing effective prompts for AI models.
- **100 Days of Code: The Complete Python Pro Bootcamp -** Completed an intensive hands-on program covering Python programming, automation, data analysis, web development, and real-world project development.
- **Intro to Data Science** – Completed course on data analysis, data visualization, and machine learning basics.
- **AI + Sustainability Virtual Internship (IBM Skills Build) –** Completed a virtual internship focused on applying Artificial Intelligence concepts to sustainability challenges and real-world problem solving.
- **Salesforce Developer Workshop** – Participated in a hands-on workshop focused on building AI-powered agents using the Salesforce platform and developer tools.
